Don't Miss the Instrument Petting Zoo This Saturday (May 3, 2014)

Did you know that studies have shown that learning to play a musical instrument increases a child's memory, mathematical, and reading comprehension skills?

Bring your child to our Instrument Petting Zoo this Saturday from 2:00 - 3:00 p.m. and the family can have fun trying out various instruments from drums to strings. Perhaps your child will find the instrument he wants to learn!

Registration is not required for this event so just drop by.
