The Future of Us

Author:

Jay Asher and Carolyn Mackler

Reading Level: Grades 7+

When Emma gets a computer for her birthday, her friend Josh gives her a free CD good for 100 hours of AOL time - totally cool, since it's 1996. Emma signs herself up for her very first AOL account, and logs on to the Internet for the first time.

The very first page she goes to is called "Facebook," something Emma has never heard of before, but then again she's never been online before - so she begins to explore the site. What she finds is herself... thirty years in the future - and it's not a pretty one.

Told in alternating chapters between Emma and Josh, *The Future of Us* explores what can happen when you know your own future - and don't like it.
