iPads in the Literacy Area

Two brand new iPads loaded with twenty early literacy, reading readiness, and interactive e-book applications are now mounted in the literacy area, next to the game computers. Several of the apps are specifically designed for children with special needs, but all of the apps can be played and enjoyed by anyone. If you look on our [Facebook](#) page, you can see more pictures of [Miss Deena](#) having a ball playing her favorite game.

The iPads were purchased thanks to funding from the Trillium Foundation. We hope you stop by soon to check out these brand new additions to our library.
