The Water Wars

Author:

Cameron Stracher

Reading Level: Grade 6-8

Vera is too young to remember a time she wasn't thirsty. Since the polar ice caps melted and the rivers dried up, there is very little fresh water left. Almost all the northern hemisphere's fresh water is controlled by the Empire of Canada and the Republic of Minnesota. Vera lives in the Republic of Illinowa where she is lucky to get a drink a day.

One day Vera meets Kai a boy with a wonderful, powerful secret. When Kai is suddenly, violently kidnapped, Vera and her older brother Wil naively set out to save him. As they encounter dangerous water pirates, the People's Environmental Army and the sinister organization Bluewater, it becomes clear that the brother and sister probably won't even be able to save themselves.
