**Reading Level:** Grades 5 - 8

Liam O'Connor is trapped below decks on the Titanic, Maddy Carter's plane is just about to explode in mid-air, and Sal Vikram is caught in a fire when a man appears and offers them a way out. Come with him and live outside society for the rest of your life, or stay and die. They each choose to follow him and are transported to New York City on September 10, 2001 where they live in a time bubble of a repeating September 10-11, and become a team of Time Riders. Their mission is to notice subtle shifts to the timeline caused by rogue time travelers and go back in time and stop the other travelers before they can alter the future.
